

We will always have
time for you.
To listen,
to explain &
to offer hope.

Are you using your
Cervical Pillow...

EVERYDAY???

SUCCESS STORY!

Before I came to see Dr. Wells, I was experiencing anxiety attacks that I never had before. My chest always felt tight, I was short of breath, and my heart would beat extremely fast during these episodes. After being adjusted only a couple of times, my anxiety got a lot better. I have yet to have another anxiety attack, which is a great relief to me.

Another area that has greatly improved since my adjustments is my allergies. As nasty as it is to describe, I have always had problems with thick mucous buildup that just wouldn't come up. Now I can honestly say that although it is still present, it is much less bothersome than before. I have experienced a lot less mucous buildup and now it comes up with no problem.

Overall, I feel like my health has gotten so much better. I think the work Dr. Wells does is life changing, and that our community is so blessed to have this special kind of chiropractic care. Thank you so much for being such a wonderful staff that truly cares and makes every visit friendly, comfortable, and impacting!

-Angelina Perry

WHAT CAN CHIROPRACTIC DO FOR YOUR CHILD?

When a Chiropractor frees the nervous system from spinal stress, the healing power of the body is unleashed: the immune system works more efficiently, resistance to disease increases, and your child's body functions more efficiently. Your child can then respond to internal and external environmental stresses such as germs, changes in temperature, humidity, toxins, allergens and all other stresses he/ she comes in contact with more efficiently. So, although children with diseases are often brought to a Chiropractor, the Chiropractor is not treating their diseases but instead reducing the nerve system stress, thus permitting their body's natural healing potential to function at its best. Ask Katie or Jess about scheduling your child for a FREE Scoliosis/ Health screening today!
